

Vituity's Suite of Telehealth Services

Vituity has invested in a full suite of telehealth solutions to transform care and extend the reach of our physicians.

Emergent/Urgent Care

Provides 24/7 member access to emergency medicine physicians to deliver convenient, timely, and cost-effective care that is a better alternative to expensive or unnecessary urgent care and ED visits.

Neurology

Saves lives and reduces disability from stroke and other neurological emergencies, giving hospitals affordable, around-the-clock acute neurology coverage in the ED and inpatient settings, with response times within minutes.

Post-Acute Care

Reduces hospital readmissions and unnecessary patient transfers with on-demand access to hospitalists, SNFists, or emergency medicine physicians who are available 24/7 to treat patients at their bedside.

Psychiatry

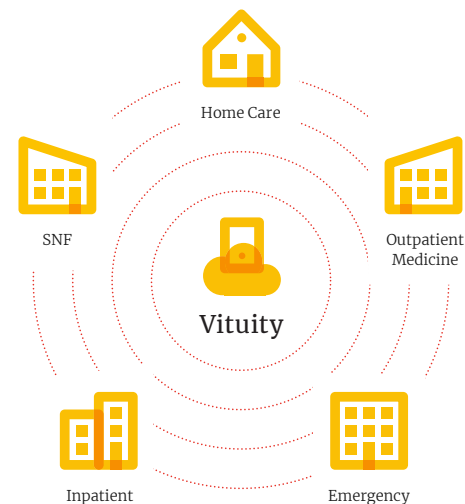

Reduces ED boarding, improves provider access, and prevents unnecessary admissions or transfers with on-demand access to board-certified psychiatrists specializing in acute and emergency psychiatry to provide patients optimal care when they need it most.

The Vituity Difference

1. Telehealth solutions driven, designed, and led by physicians
2. Board-certified physicians providing care
3. Proprietary clinical protocols to improve outcomes and care delivery
4. Customized platforms designed for an optimal patient and doctor experience
5. Coordinated, longitudinal care in collaboration with the patient's medical home

Why Vituity Invested in Telehealth?

It's the right thing to do for the patients, clients, and communities we serve.

About Vituity

As a physician-led and -owned, multispecialty partnership, Vituity has driven positive change in healthcare for over 40 years. Our 3,000 doctors and clinicians provide compassionate, integrated acute care across the country, serving over 6.3 million patients annually.
