About Vituity
With over 20 years of experience, Vituity is a leading acute care expert serving patients across a variety of medical specialties. As a physician-led and -owned Partnership, Vituity places clinical expertise and patient outcomes at the center of our practice. Our acute focus and compassion are the driving forces that have positioned us at the heart of better care.

Meet Our Leaders

Yafa Minazad, DO
Vice President of Operations, Acute Neurology
Dr. Minazad has trained in multiple subspecialties, including intraoperative monitoring (IOM) and advanced EEG modalities. Before joining Vituity, she developed and directed a neurophysiologic IOM program. She also cofounded one of the nation’s first neurohospitalist practices. Dr. Minazad is board-certified in both neurology and clinical neurophysiology.

Arbi Ohanian, MD
Vice President, Neurology
Dr. Ohanian has pioneered new approaches to acute neurology care as an educator, clinical leader, and entrepreneur. Before joining Vituity, he served as medical director of a Comprehensive Stroke Center. He later cofounded one of the nation’s first neurohospitalist practices. Dr. Ohanian is board-certified in both general and vascular neurology.

Comprehensive Acute Neurology Solutions
Rapid access to care saves lives

Vituity’s Acute Neurology solutions help hospitals to expand their neurologic care capabilities and offer a broader range of services. Our panel of board-certified neurologists use innovative approaches to improve cost efficiency and deliver best practice patient care for stroke and other acute neurologic conditions.

Expand services, reduce costs, and improve the standard of care.
When a neurologic emergency strikes, Vituity is committed to saving lives and preserving quality of life. Our proven care models deliver fast, expert treatment that gives patients the best possible chance of recovery. Enhance your hospital’s reputation by bringing this valuable service to your community.

When every second counts
As our population ages, stroke and neurodegenerative disorders are on the rise. Stroke is the leading cause of long-term disability and the fifth most common cause of death in the United States. Hospitals are challenged to meet this growing demand with prompt, specialized care.

- The United States is experiencing a shortage of neurologists, with the most critical need occurring in acute care settings.
- At the same time, demand has never been greater for neurologists with expertise in stroke and other emergent neurologic conditions.
- Patients who seek stroke care at hospitals without staff neurologists experience poorer clinical outcomes.
- Hospitals that lack a robust neurology program lose money to patient transfers and incur quality program penalties.

Transforming care, improving lives
Vituity’s proven neurology care models can be customized to fit your needs. We offer a variety of solutions, including:

Teleneurology/Telestroke
- Consult 24/7 with a dedicated panel of fellowship-trained neurologists
- Expand your in-house capabilities and reduce diversions and transfers
- Provides expert leadership for stroke and acute neurology programs
- Response time of < 5 minutes
- Remote patient examination and diagnostics review
- Quickly initiate thrombolytic therapy and determine candidacy for neurointerventional procedures

Neurohospitalist services
- Virtual or on-site support for your patients and medical staff
- Daily ED and inpatient rounding by a neurohospitalist-led team
- Consistent utilization of stroke order sets required for Joint Commission certification
- Enhanced communication and care coordination
- Review of imaging studies and other ancillary testing
- Integration with your palliative care teams

Specialty services
We offer a number of specialty services, including Primary and Comprehensive Stroke Center certification support, intraoperative monitoring, outpatient neurodiagnostic services, and advanced EEG modalities.

Take care to a new level
Vituity’s acute neurology solutions bring a world of benefits to your patients and hospital:

Attract new patients
Expand your capabilities to capture more market share and reduce out-of-system transfers.

Reduce Costs
Prevent overutilization, reduce Medicare penalties, and shorten inpatient length of stay.

Improve patient care
Quickly deliver lifesaving treatments like thrombolytic (tPA) therapy and neurointerventional procedures.

Be recognized for excellence
Achieve Joint Commission certification as a Primary or Comprehensive Stroke Center with the help of our expert consultants

Enhance patient experience
Vituity neurologists work with your emergency medicine, critical care, hospitalist, and anesthesiology services to promote positive outcomes and smooth transitions.

Develop an exceptional neurology program
Gain the clinical leadership you need to expand your services, drive new initiatives, and streamline operations.
